Second reading, public hearing and consideration for adoption will be held on 05/16/2022 at 6:00 p.m.

WHEREAS, to protect the public health, safety and welfare of the citizens of the Township of Middle, there is a need to upgrade lateral service to commercial properties to incorporate a 6-inch lateral sewer line; and WHEREAS the Township Committee also deems it appropriate to enact a procedure to allow commercial properties which will have less sewer flow usage to appeal the requirement of the enhanced lateral size and to establish a procedure for the appeal.

NOW, THEREFORE, BE IT ORDAINED AS FOLLOWS

SECTION 1: The Averments set forth above shall be incorporated herein as if set forth at length.

SECTION 2: The following section shall be added to Chapter 204 as an amendment and shall be inserted in Section 204-22C(1) of that Chapter as subsection “(c)”:

204-22C(1)(c) LATERAL UPGRADES / FLOW METERS / APPEAL PROCEDURES

(i) All new commercial construction shall be required to install a 6-inch diameter lateral. For commercial developments containing multiple, separate units, each individual unit must be provided with its own, independent lateral connection. Each commercial lateral connection must be provided with separate clean out located at the building property line, accessible to the Township.

(ii) All new or existing commercial units shall be required to install an individual water flow meter if not serviced with Township water or the service recipient shall pay the default service rate set forth in the attached Schedule A-1, which is predicated upon DEP guidelines.

(iii) In the event that a new commercial property is serviced by a preexisting 4-inch lateral and the service recipient can demonstrate that the flow warrants the installation of a 4-inch line, then said service recipient may appeal to the Township for relief permitting the 4-inch lateral to remain.

(a) such appeal shall be initiated by providing the following:

(1) A detailed letter to the Administrator requesting the proposed relief;

(2) A written calculation by a licensed engineer or architect demonstrating the actual flow of the proposed commercial unit;

(3) Internal inspection by CCTV of the existing lateral or other evidence satisfactory to the Township establishing the existing condition of the preexisting lateral and acceptability for continued use;

(4) A detailed diagram of the building; and

(5) a \$500 escrow fee to cover the cost of the appeal review

(b) The appeal shall be decided by the Sewer Engineer, whose determination shall be binding.

(c) Further, in the event that the use of such a commercial premises changes, then the new service recipient must demonstrate the level of flow usage to justify the continued use of a 4-inch lateral, or the service must be upgraded to a 6-inch lateral.

SECTION 3: Any other Ordinances in conflict or inconsistent with this Ordinance are hereby repealed, to the extent of such conflict or inconsistency.

SECTION 4: Should any section, paragraph, sentence or clause or phrase of this Ordinance be declared unconstitutional or invalid for any reason, the remaining portions of this Ordinance shall not be affected thereby and shall remain in full force and effect and to this end the provisions of this Ordinance are hereby declared to be severable.
